Introduction

When I speak of spirituality I'm not talking about memorizing scripture and being able to say Hallelujah after every sentence that comes out of your mouth. A lot of people do these kinds of things to impress others not to uplift God and Christ. I'm also not talking about the kind of spirituality associated with crystals, magical squares and expensive retreats. When I speak of spirituality I am referring to that special one on one relationship with God and Christ that is a part of your daily living that goes beyond church attendance and tithes. God's spirituality is about tackling the meat of God's word it's about an advanced state of spiritual growth and maturity that can only come through personally experiencing God.

I am placing a call of repentance and spirituality to all of those who know God and Christ but desire to go deeper into His word and deeper into His presence. I am placing this call not for followers but for those who are willing to be a light to the world through their daily living. If you are ready to go a step higher into His word and ready to give yourself completely into His service, this call is for you. This is a call for God's spirituality.

WHY AM I MAKING THIS CALL FOR PEOPLE TO BECOME SPIRITUAL

I am seeing more and more people become disillusioned with God because of some of the antics they are seeing in ministries and the growing religious-political factions. I am seeing more people filled with the word of God but stumped in their growth because their church only takes them so far. People desire to know more of God's word and to learn how to become closer to God but the messages they continuously hear from the pulpit are for those who are new in the word.

WHY YOU SHOULD WANT TO BECOME SPIRITUAL

There are three kinds of people in this world those who have evolved those who are stagnated and those who have digressed. As human beings, like all other living things in God's creation, we were meant to grow and develop into brighter, better and stronger beings in a world that is always evolving and moving into the future, therefore, we are beings of evolution, growing and evolving. Individuals who are not growing and moving on in this life are either standing still or digressing. When I say beings of evolution I'm not referring to man-made theories, I am referring to the natural law and order of Gods universe.

Have you seen what happens to food that is left out too long or water that stands too long? It becomes stagnated and slimy, fuzzy, icky stuff begins to grow in it making it toxic and poisonous to consume. As human we are the same way, if we don't grow and develop we will become stagnated full of negativity, sin and corruption which consumes the person like a cancer. Yeshua taught that salt which has lost its savor is good for

nothing but casting down on the ground like sand to be walked upon and blown in the wind. People who have become stagnated are of no benefit to themselves and definitely not to others. To become stagnated in life is the same as giving up on life but stagnation is only one step above the worst which is the person who is digressed.

The person who is digressing in life is doing so of their own free will. They have chosen their path in life which happens to be a downhill journey to self-destruction and even hell. For whatever reasons, the person who chooses to digress in life has essentially lost contact and faith in God. Among this group of individuals are the notorious reprobates who choose the pleasures of their sins over the laws and spirit of God and knowingly walk a short road to hell.

Out of all three types of humans the stagnated one is the worst because the other two know where they are going but the stagnated person hasn't a clue, they are lost in their own little world and notions, stuck in their own puddle of mud, blind to the many outstretched hands wanting to help them out.

You should want to be a part of those who see the light, see the truth and are evolving and moving in the right direction, which is towards God and Christ. You have a choice of what to do with your life why not take the high road and do something good for yourself. Why live a stagnated life? Why choose a short road to hell when you can have eternal life with God? The mere fact that you are reading this pamphlet lets me know that there is some part of you that wants to grow and evolve. Just like the butterfly coming out of its cocoon it's your turn to shed your old life and turn over a new leaf. Spirituality is a win win situation that will bring you so many benefits.

I can give you all kinds of examples, preachings and sayings to try and help convince you to make the choice to become spiritual but that would be wrong. You have to make the choice to become spiritual by yourself. Becoming spiritual person is a serious and major step in life that will change your life entirely and YOU have to WANT to do it.

THE BENEFITS OF BEING SPIRITUAL

The world rewards you for being successful in it and following its ways with material gain. The world can give you power and status among your fellowman when you are obedient to its dictates. There are more people who choose to follow the ways of the world than spirituality because of what they can gain and have in this life. You must pay a price to follow anything, the price for the world will be your dignity and worth as a human being but the price for spirituality is taking up the cross of Christ.

The world as I said, can offer you material gain, status, power and money if you follow its ways and many people are lured into the world by these gains. However, what the world has to offer is only for in this world and is most often short lived and comes with

a very high price such as your soul, respect and dignity. A life without respect and dignity is a not a life at all. There is no life without a soul it is only a shadow of an existence. There are a lot of wealthy and powerful people who are not living but merely existing beyond the value of their material wealth they are nothing but a shadow. Whatever the world gives you cannot be taken beyond the grave, cannot add years to your life and after you die will fall into the hands of others who want appreciate or value it like you did. The gains of the world are subject to decay, rot, ruin and theft but the gains from spirituality are eternal and of a higher nature.

When you become a spiritual person your life will change dramatically, you will go through tests but with each victory will come blessed gifts from God. As your spirit grows so will your blessings. If you need your financial situation to improve God will send you opportunities to improve it and don't get me wrong, I'm want have you thinking money will fall out of the sky into your lap. Your financial blessings will come as a result of the changes you make in your life through the trials you overcome. You will have to put forth some effort.

MAKING THE DECISION TO BECOME SPIRITUAL

Choosing to become spiritual in your life is a major step that you should think carefully about. Most important you need to make sure that your motives are correct for wanting to do this. It's also important to think about all the things you will have to give up and be honest with yourself about your ability to do so. Making the decision to become spiritual is one decision you have to be sure of because once you start there is no turning back, to turn back is to become a reprobate which is the worst kind of human there is.

The decision to become spiritual must be your decision and you have to do it for you not for anyone else. Take your time and think seriously if this is something you would want to commit to for the rest of your life. Making the crucial decision is like walking through a gateway. As you stand before the gateway of spirituality, behind you is your old life, old ways and in front of you is the door way to change, transformation and a whole new life. You have to make the decision. Don't let anyone influence you or talk you into it. Do this one on your own. Pray about it and follow your spirit.

Make sure your decision to become spiritual is not for material gain, to impress others or to create a false image of yourself. In today's church we are seeing a great surge in people becoming ministers, prophets and evangelists and a majority is doing so for money, power and as a stepping stone into politics. Becoming spiritual should be based on a desire to connect with God and build a more meaningful life not for a big bank account or title. Yet, becoming spiritual doesn't mean you have to be a preacher, evangelist or prophet. Your decision making process for becoming spiritual should

include looking honestly at your motives and making sure you're not doing this for the wrong reasons.

Being honest with yourself is important because you have to be able to look at all the sins and negativity in your life and decide if you're willing to give those things up, are you ready to make a change in your life. Are you ready to stop cursing, flirting, sleeping around, and gossiping, stealing, drinking, drugging, hanging out with bad people? Are you ready to take responsibility for your own life and making effort to do something positive with your life? These are a few questions you have to ask yourself and your answers should determine if you're ready to make the necessary changes to become spiritual.

Sister Sharon Roach is the pioneer of Truth Based Prophecy, prophetess and spiritual woman of God. She is also the founder of the Ameth Life Assessment available at www.amethlifeassessment.info and author of many prophecy works available for free at www.americanprophecy.org If you would like to invite Sister Sharon to your program or event or to conduct a indepth prophecy class in your community please email prophetroach@gmail.com
